HOW TO USE A CIPHER WHEEL

First, decide what letter will be your “key letter.” Then, turn the smaller, inner wheel until the key letter lines up with the “A” on the larger, outer wheel. (IMPORTANT: Both the sender and receiver of the message must know the key letter.)

To encipher a message (convert to code), simply find each letter from your message on the OUTER wheel and substitute it with the corresponding letter on the INNER wheel.

To decipher a message (convert from code), simply find each letter from the message on the INNER wheel and substitute it with the corresponding letter on the OUTER wheel. Remember, your cipher wheel must be set to the key letter.

Try to decipher this: KYVIV ZJ FECF FEV KILV XFU

(Hint: Key letter = R)
