# Were Dinosaurs Dragons?

**S**ome dragons flew and other dragons lived in the water, so not all dragons could be called dinosaurs because dinosaurs lived on the land. But all dinosaurs could have been dragons.

Cultures from all over the globe have dragon legends. The descriptions of these beasts are often very similar to those of dinosaurs.

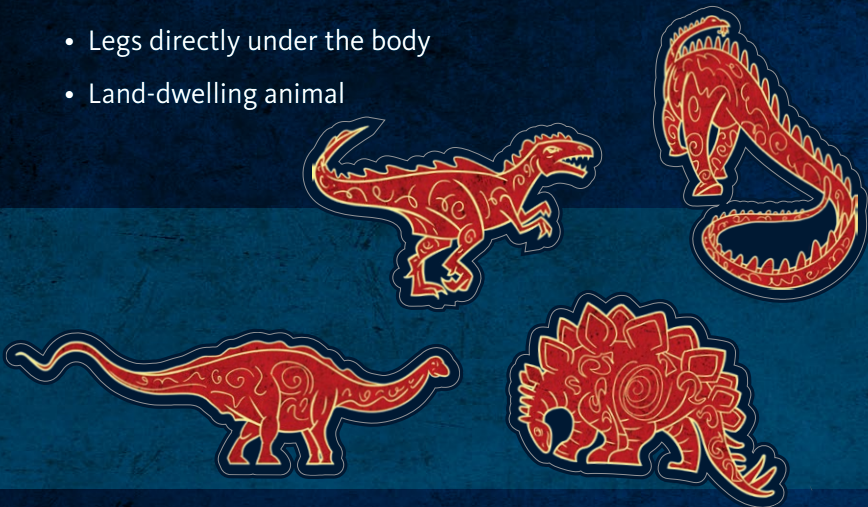

Carvings and cave paintings of these monsters have been discovered. Some of these dragon legends contain mythical elements, while others likely lost all the true details and retain nothing more than tall tales. But in many cases, the dragons were viewed as real animals.

Some reptiles are mistakenly called dinosaurs.  
Place the stickers in the correct category.

## Dinosaur

- Legs directly under the body
- Land-dwelling animal

## Not a Dinosaur

- Legs out to the side
- Flying reptiles
- Marine reptiles

1:1
